### Stands and equipment for testing common rail injectors and pumps

TRIUMF – test bench for testing 1-4 CR injectors	
CRUIS – Test bench for testing CR injectors	
CR-Test 4E – test bench for testing pumps and 1-4 CR injectors	
CR-Test-2P – Stand for testing high pressure fuel pumps Common Rail system	57
Additional equipment and accessories for stands	66
Modernization kit for CR-Jet-4E stands.	70
PUMP TEST.02 – common-Rail High Pressure Pump Testing Equipment	71
CR TESTER . CRT-5040 – a device for testing 1-4 CR injectors	
FLAGMAN-FLOW – 8-channel injector dosage measuring unit	
FLAGMAN-FULL – equipment for testing 1-4 CR injectors without coding	73
FLAGMAN-CODE – equipment for testing 1-4 CR injectors with coding	74
FLAGMAN-CODE-L – equipment for testing 1-4 CR injectors with coding	75
CR-Active – injector signal activator CR	
CR-NeXT – Armature activator device for Common Rail injector solenoid valve	76
MONICA – Common Rail injector electromagnet actuation current measuring device	
PTC-2520 CP TESTER – injection pump tester CR	76
FMDE-520 – instrument for checking the performance of injection pump CR	76
CRistina-PIEZO – PIEZO injector tester CR	
CRISTINA – complex for assembly and adjustment of CR injectors	
PR-TESTER.V05 – electronic pressure gauge 2-channel	
Basic kits for testing CR injectors	80
Sets of flasks and adapters for backflow of CR injectors	86
Backflow fitting kits for CR injectors	87
Universal adapter for truck injectors CR DL-CR50013	
Adapter for cargo injectors CR Denso to connect the supply and backflow	
Truck injector test adapters	100
Equipment for testing pumps and nozzles	107
Retrofit kit for 2400 bar CR-Jet stands

### Equipment and tools for repairing common rail injectors

CRISTINA – complex for assembly and adjustment of CR injectors.	
CRISTINA «BASE» set	
CRISTINA «BASE-F» set	
CRISTINA «FULL» set	140
CRISTINA «PROF» set	141

CRISTINA «PROF FULL» set	.143
CRISTINA «SPECIAL» set	145
Table stand for tripod CR-CRistina	.148
Open-end spanner set	.148
Pneumatic press	.149
CR injector repair kits	.150
Set of probes and adapters	
Set of goniometers to control the tightening of the atomizer nut	.153
Clamp for dismantling and assembling CR injectors	154
Adapter kits with digital indicators for measuring mounting clearances and stroke of the spray gun and	d
valve	159
CRistina-PIEZO – PIEZO injector tester CR	.163
CR Siemens VDO injector repair kits	.164
Hand presses	.177
MP-250 SASH – CR injector multiplier valve seat restoration machine	179
Lapping	180
Diamond pastes, lapping plates, a set of washer holders for grinding them	
Том-2 – Grinding machine for dressing of the laps	
Том-5 – Grinding machine for dressing of the laps and other bodies of revolution	
BOSCH PIEZO injector recovery kit	
DL-GR7500 – Grinding machine for the needles of nozzles	
<b>DL-GR7400</b> – Grinding machine for nozzle needles with rotation speed indicators in percent	
<b>DL-GR7300</b> – Grinding machine for the needles of nozzles with speed indicators	
Sets with an industrial microscope, an extended stand, a backlight and a monitor	
Abrasive stones for GR machines	
Diamond pencils, stone holder, stone balancing axis	
Balancing fixture, stone remover, drive pulley kit	
Additional equipment and accessories for grinding machines.	
<b>GM-08</b> – surface grinder with lower movable work table	
MGM-500 – sliding column surface grinder	
Universal clamping tools for CR and CR Denso injectors.	
Nozzle holder blocks CR for vise	
Wrenches for disassembling / assembling injectors	
Bit wrenches for mounting / dismounting the nozzle nut of CR injectors	
Nozzle wrenches for mounting / dismantling the collar nut of the CR injector injectors	
Nozzle wrenches for mounting / dismounting the atomizer nut for BOSCH, VDO (Siemens) and BOSC	
series 111 piezo injectors	
Nozzle wrenches for mounting / dismantling the nut of the spray nozzle CR BOSCH, VDO	
(Siemens), DENSO, DELPHI all types.	
Hexagonal wrenches with a square hole for a torque handle	
Keys for disassembly / assembly of the CR SCANIA injector	
Nozzle wrenches for mounting / dismantling the nut of the Delphi Smart Ø20.9mm, Bosch Ø25.8mm	0
injector nozzles. Tools for installing / removing the CRIN injector valve	221
CR injector support ring removal and installation kit	

Set of tools for installing the paronite ring of CRIN injectors	222
DENSO CR injector filter removal and installation kit	223
Sets of cutters for cleaning the seats of the engine injectors Delphi, Bosch	224
Torque wrenches, adapters	225
Pullers for extracting CR injectors	226
Kits for measuring compression in diesel engines	228
Set for measuring fuel pressure in the low pressure line in diesel and gasoline engines	228
Mechanical measuring heads	229
Indicator measuring heads	
Racks magnetic for installation of an indicator measuring head	235
Digital caliper. Digital micrometer.	236

### Auxiliary equipment and tools for checking and repairing dta

Special table-workbench CR-NEXT-ST01	. 237
Bathtubs are corrosion-proof. ultrasonic baths. Small Parts Cleaning Container	237
A set of anti-magnetic tweezers. High magnification lens. microscopes	238
Sets with industrial microscope, tripod, illumination and monitor	239
Штативы-держатели для микроскопа	. 247
Control rack for test benches for injectors and injection pumps	. 248
Endoscope camera	. 248
Hand presses	249

### Equipment and tools for testing and repairing common rail pumps

PUMP TEST.02 – equipment for testing injection pump CR	251
FMDE-520 – CR injection pump performance tester	252
PTC-2520 CP TESTER - a device for testing high pressure fuel pumps CR	252
ST-03 – universal cradle for CR pumps	253
Flanges for injection pump CR	254
Couplings for injection pump CR	
A set of supports for installation on the stand of Denso HP0 pumps.	
Equipment for repair of injection pump CR CP4 Bosch	260
Set of clamps for assembly of injection pump CP3	260
Adapters for pressure measurement in injection pump CR CP-3	261
Adapter kit for measuring the pressure of the booster pump CR	261
Set of fittings with lock for pump test CP1	261
Additional equipment for adapter DL-CR31497	262
Fittings for connecting high-pressure fuel pumps. Liquid filters	263

### 5

### Stands and equipment for testing unit injectors (UIS) and pump sections (UPS)

DORPAT Multi-Cam11 – stand for testing unit injectors, pump sections	.264
Дополнительное оснащение для DORPAT Multi-Cam11	.271
CAM-BOX1 FORCE – basic kit for testing unit injectors and single pumps (UI / UP SYSTEM)	.278
Additional equipment for CAM-BOX 1	.281
CAM-BOX 2 MASTER – test kit for unit injectors and single pumps	.283
Additional equipment for CAM-BOX 2	286
CAMBAT-FLOW - injection meter of pump-injectors of pumping sections of the UIS/UPS system (for	
UIS-Tester MULTICAM)	.294
CAMBAT-FULL-SET – equipment for testing and checking the unit injector of pump sections of the U	IIS /
UPS system with a mechanical part	296

### Equipment and tools for the repair of unit injectors (UIS) and pump sections (UPS)

<b>DL-ST02</b> – clamp for dismantling and assembling the unit injector of CR injectors	297
Keys for positioning the electromagnet in unit injectors	301
Keys for mounting / dismantling the nut of the electromagnet of the pump injector valve	
Keys for mounting / dismantling the spray nut of the unit injectors	
Caterpillar injector holder adapter	304
Kit for measuring the stroke of the unit injector valve	305
Stand adapter for indicator	
Комплект ключей для разборки-сборки насос-форсунок AUDI / VW	306
Tool kit for disassembly-assembly NF Audi / VW Siemens VDO	307
Tool kit for disassembly-assembly NF AUDI / VW 1.9 PDE-P1.5	308
Tool kit for disassembly-assembly NF AUDI / VW 2.0	309
Adapters for testing the injector part of unit injectors	310
Adapters for CATERPILLAR	313
Adapter kits for testing the injector part	315
Hand presses	316
A set of diamond laps and reamers for restoring the valve seat	318
BOSCH injector pump	318
Injector pump valve for VOLVO, SCANIA, IVECO	
Sets of diamond laps and reamers	319

## Equipment and tools for testing and repairing heui unit injectors

Equipment and tools for checking and repairing HEUI unit injectors	320
Adapter for testing the injector part of HEUI unit injectors	.321
O-ring installation kit for HEUI unit injectors	.321
Wrench for unscrewing the nut of the HEUI unit injector sprayer.	.321

### Stands for testing fuel pumps high pressure injection pump

SPF-708, SPF-712, SPF-1108, SPF-1112 - assay stands for injection pumps	.322
РТВ-3, РТВ-5, РТВ-7, РТВ-9, РТВ-12 –	.324
high-power assay stands for high-pressure fuel pumps	324
PTB14 – assay stand with a capacity of 45 kW for injection pump	.325
Additional equipment and accessories for stands for testing high-pressure fuel pumps	.327

### Equipment and tools for repair of high pressure fuel pumps

Compensation clutches. Couplings are flanged. Couplings are conical. Spline couplings	329
Equipment and tooling for rotary injection pumps and in-line injection pumps	330
Devices for adjusting in-line injection pumps	
Couplings for fastening to the pump flange for high-pressure fuel pumps of the VP series	334
ST-03 – universal cradle for CR pumps	335

## 10

## Electronic devices for diagnostics and repair of diesel fuel equipment

CD TESTED CDT 5040 device for testing 1 4 CD injectors	226
CR TESTER CRT-5040 – device for testing 1-4 CR injectors	
FLAGMAN FULL – equipment for testing 1-4 CR injectors without coding	
FLAGMAN-FLOW –injector dosage measuring unit 8-channel	
FLAGMAN-CODE – equipment for testing 1-4 CR injectors with coding	
FLAGMAN-CODE-L – equipment for testing 1-4 CR injectors with coding	
<b>CRISTINA</b> – complex for assembly and adjustment of CR injectors	
DL-UNI20150 CRISTINA - PIEZO – PIEZO injector tester CR	341
DL-UNI20150A CRISTINA - PIEZO ACOUSTIC – PIEZO injector tester CR	
DL-UNI20050 CRISTINA - PIEZO – set for check and regul. PIEZO-CR injectors	343

<b>DL-UNI20051A</b> set for checking and adjusting PIEZO injectors CR without clamp.         Additional equipment for CRISTINA-PIEZO. <b>CR-NeXT</b> – Armature activator device for Common-Rail injector solenoid valve.	
<b>DL-UNI20051A</b> set for checking and adjusting PIEZO injectors CR without clamp.         Additional equipment for CRISTINA-PIEZO. <b>CR-NeXT</b> – Armature activator device for Common-Rail injector solenoid valve.         Device for measuring the capacitance of piezo-packet injectors RLC.	
<b>DL-UNI20051A</b> set for checking and adjusting PIEZO injectors CR without clamp.         Additional equipment for CRISTINA-PIEZO. <b>CR-NeXT</b> – Armature activator device for Common-Rail injector solenoid valve.         Device for measuring the capacitance of piezo-packet injectors RLC. <b>PUMP TEST.02</b> – equipment for testing injection pump CR.	
DL-UNI20051A set for checking and adjusting PIEZO injectors CR without clamp.         Additional equipment for CRISTINA-PIEZO.         CR-NeXT – Armature activator device for Common-Rail injector solenoid valve.         Device for measuring the capacitance of piezo-packet injectors RLC.         PUMP TEST.02 – equipment for testing injection pump CR.         FMDE-520 – instrument for checking the performance of injection pump CR.	

PR- INDICATOR – electronic pressure gauges	.359
PR-TESTER.V05 – 2-channel pressure measuring device	.360
PR-TESTER.V03 – a device for measuring pressure. Oscilloscope attachment	.362
CR test kits	.363

## 11

### Control and measuring tool and Instrumentation

Pressure gauges and accessories	
Dial-type mechanical measuring heads	
Indicator measuring heads	<u>3</u> 71
Racks magnetic for installation of an indicator measuring head	
Digital caliper. Digital micrometer.	
Stand for digital micrometer	
Комплекты для измемерения компрессии в дизельных двигельных	378
Set for measuring fuel pressure in the low pressure line in diesel and gasoline engines	
Torque wrenches, adapters	379
Hand presses	
Set of goniometers to control the tightening of the atomizer nut	382

## Filters and consumables for<br/>test stands for Diesel Fuel Equipment

Liquid fine filters	.383
Filters - settlers. Liquid filters. Mesh 15 μm for filters	
High pressure filter adapter DL-UNF21100	.386
High pressure filter for pressure accumulators (Rail)	.386
Adapter with high pressure Bosch filter	
Calibration fluid SRS	
Supplied complete with power supply.	.388
Fittings for connecting hydraulic and pneumatic systems	

### Spare parts for repair Diesel Fuel Equipment and other equipment

Adjusting washers for Common-Rail injectors BOSCH	393
Adjusting washers for CR DENSO injectors	
Adjusting washers for Common-Rail VDO (SIEMENS) PIEZO injectors	399
Adjusting washers and adjusting elements for Common-Rail injectors DELPHI	400
Adjusting washers for Unit Injectors (UIS) and Single Pumps (PLD)	
Tools and fixtures for grinding washers and other parts.	403

Control boards for Dieselland equipment

**TRIUMF** benches are manufactured with the possibility of retrofitting with a hardware and software complex for encoding Bosch, Delphi, Denso injectors. To encode the Delphi injectors, a device is additionally installed, which allows to create a vacuum in the backleak line of the injector. The set of the vacuum creating device is a gear pump, a venturi tube and an electric motor. The device is installed on the bulkhead, which is located in the lower part of the bench above the cooling unit.

• The software allows you to code injectors BOSCH isa / ima cod, Delphi C2i / C3i / C4i\*, Denso, VDO Siemens.

• Working pressure up to 1800 bar. It is possible to increase the working pressure to 2400 bar.

- The stand is produced with the following characteristics of the main drive:
  - TRIUMF 4 kW 380 V
  - TRIUMF 5,5 kW 380 V

\* coding Delphi C4i in the stand TRIUMF 5,5 kW 380 V

### Software «CASCADE»

The software has a user-friendly interface. The program contains built-in test plans for testing and coding Bosch, Delphi, Denso, Siemens (VDO) injectors. Functions for creating new test plans, editing built-in ones, as well as creating targets for Delphi C2i, C3i, C4i injectors are available. The results and progress of testing are displayed in graphical form and saved to a file and sent to print.

### The stand is equipped with a modern system of thermal stabilization test liquids in the tank, which includes:

1. Two radiators with forced air cooling for the backflow line from the injection pump and the backflow line from the pressure accumulator (rail).

2. Pressure accumulator with cooling. The rail cooling line includes an individual air-cooled radiator and a circulation pump.

- 3. Independent refrigeration unit with air heat exchanger.
- 4. Three individual thermal controllers for controlling radiator fans.
- 5. Tubular electric heater with a power of 1000 W for heating the test liquid in the tank.
- Operating pressure up to 2400 bar.
- The pressure is controlled by two regulators.
- The stand has an electronic measurement system with the ability to check four injectors at the same time.
- The stand is equipped with a frequency converter.

### TRIUMF

#### **OPTIONAL EQUIPMENT AND ACCESSORIES**

#### DL-UNF20420L

A set of sedimentation filters for testing injectors on the stand TRIUMPH. Designed for preliminary cleaning of nozzles before their bench test.

#### Комплект поставки:

- 1. **DL-UNF20300L** Settling filter (inlet on the left) 2 pcs.
- 2. **DL-UNI31427** Adapter 1/8"xM14x1.5mm 4 pcs.
- 3. **34-RL010602** Quick adapter straight  $\emptyset$  6x1/4" 2 pcs.
- 4. **34-RL310602** Quick adapter angled Ø 6x1/4" 2 pcs.
- 5. **DL-UNI31399** Splitter <sup>1</sup>/<sub>4</sub>" 1 pc.

Attention! All items are also sold separately.

#### DL-UNF20420L

Filter - sump (entrance on the left) *The filter contains:* 

- 1. Holes for entry and exit M14x1.5mm
- 2. Mounting holes Ø 8mm

### DL-UNI31399

Splitter ¼" *Attached to the splitter:* 

- 1. **34-RL010802** Two quick adapters Ø 8mm (at ends)
- 2. **34-RL310601** Two corner fast adapter Ø 6mm (at the ends)

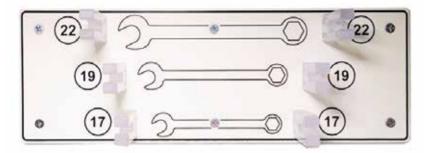

### TRIUMF

#### **OPTIONAL EQUIPMENT AND ACCESSORIES**

### DL-UNI01792

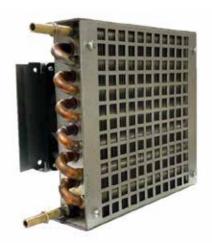

A set of open-end wrenches for the TRIUMF stand has a convenient and secure fixation of keys directly in the test bench.

#### Contents of delivery:

- 1. DL-TRF50244 Key holder
- 2. DL-UNI31217 Open-end wrench 17x17mm -1 pc
- 3. **DL-UNI31219** Open-end key. 19x19mm -1 pc.
- 4. **DL-UNI31222** Open-end key. 22x22mm -1 pc.

Attention! All keys are also sold separately.

### **DL-ORV6**

Air defense radiator for pressure accumulator stands TRIUMF

#### **OPTIONAL EQUIPMENT AND ACCESSORIES**

### DL-HEUI0037

### TRIUMF Low Pressure Equipment 0-8 bar for HEUI injector chec ks

### CRUIS

The **CRUIS** stand allows you to perform procedures related to testing and checking Common-Rail injectors from manufacturers such as Bosch, Denso, Delphi, VDO (Siemens), Cummins, AZPI, as well as HEUI Caterpillar unit injectors installed on diesel engines of light and medium-sized automobiles, including high-speed engines of cars and trucks, buses, agricultural machinery and tractors.

• The software allows coding BOSCH isa / ima cod, Delphi C2i / C3i / C4i\*, Denso, VDO Siemens injectors.

- Stand working pressure up to 2400 bar.
- The stand is produced with the following characteristics of the main drive:
  - CRUIS 4 kW 380 V,
  - CRUIS 5.5 kW 380 V,
  - CRUIS 4 kW 220 V

\* Delphi C4i coding in CRUIS 5.5 kW 380 V

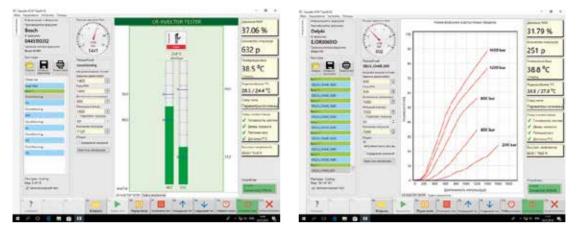

When installing additional equipment, the CASCADE program allows you to test HEUI unit injectors.

### CRUIS

### Software «CASCADE»

### The stand has a low noise level.

When starting the high-pressure pump, its smooth spin-up is ensured due to the use of a Schneider frequency converter in the stand.

The design of the CR test stand and the elements of its equipment meet the requirements of international standards in terms of static and dynamic parameters of ISO 4008/1 and ISO 4008/2.

For coding Delphi injectors, a device is used that allows creating a vacuum in the injector backflow line. The set of the device that creates a vacuum includes a gear pump, a venturi tube and an electric motor. The device is installed at the bottom of the stand next to the refrigeration unit. Also, in the working (test) area at the top right, a pressure gauge is installed that measures the vacuum with an electrovalve providing vacuum access to the nozzle. In this case, the vacuum is regulated by a throttle valve installed under the monitor on the left. When coding Delphi injectors in the CRUIS stand, a sensor is used that determines the injection start time.

The program with test plans is included in the package. Software updates that include new test plans are released twice a year and are provided free of charge.

### For thermal stabilization of the test liquid in the tank, the following are used:

1. two radiators with forced air cooling for the backflow line from the injection pump and the backflow line from the pressure accumulator (rail).

- 2. independent refrigeration unit with air heat exchanger.
- 3. tubular electric heater 1000 W

Operating pressure up to 1800 bar. It is possible to increase the working pressure up to 2400 bar.

The stand has an electronic measurement system with the ability to check one nozzle.

The test bench **CR-Test4E** allows checking the following equipment of the COMMON RAIL system: BOSCH, DENSO, DELPHI nozzles, (SIEMENS optional), BOSCH, DENSO, DELPHI, SIEMENS pumps (CP1, CP2, CP3, HP2, HP3, DFP1, DFP3, DFP6, HP3, HP4), regulators and pressure sensors. The operating pressure of the test is up to 1800 bar. At the request of the customer, there is possibility to increase the working pressure to 2200 bar. Test bench is equipped with an electronic measuring system. Test bench includes a software with built-in test plans.

**CR-Test-4E** - test stand for Common Rail (CR) injectors and pumps with an electronic measurement system (simultaneous testing of up to 4 injectors); The performance of the CR injection pump is checked using a two-channel flow meter.

### Software

### «CASCADE»

The complex includes software software for testing CR injectors

### **«DieselTest»**

The complex includes software pump testing software

### Программное обеспечение «CASCADE»

The software has a user-friendly interface. The program contains built-in test plans for testing and coding Bosch, Delphi, Denso, Siemens (VDO) injectors. Functions for creating new test plans, editing built-in ones, as well as creating targets for Delphi C2i, C3i, C4i injectors are available. The results and progress of testing are displayed in graphical form and saved to a file and sent to print.

### The stand is equipped with a modern system of thermal stabilization test liquids in the tank, which includes:

1. Two radiators with forced air cooling for the backflow line from the injection pump and the backflow line from the pressure accumulator (rail).

2. Pressure accumulator with cooling. The rail cooling line includes an individual air-cooled radiator and a circulation pump.

- 3. Independent refrigeration unit with air heat exchanger.
- 4. Three individual thermal controllers for controlling radiator fans.
- 5. Tubular electric heater with a power of 1000 W for heating the test liquid in the tank.
- Operating pressure up to 2400 bar.
- The pressure is controlled by two regulators.
- The stand has an electronic measurement system with the ability to check four injectors at the same time.
- Drive motor power for checking high pressure fuel pump 11 kW
- Drive motor power for checking injectors 5.5 kW
- The stand is equipped with frequency converters.

### **CR-Test2P**

Stand **CR-Test2P** for testing high pressure fuel pumps Common Rail system.

The CR-TEST-2P test bench allows you to perform procedures related to the testing of high-pressure fuel pumps of the Common Rail system of various manufacturers (Bosch, Denso, Delphi, VDO (Siemens)). The design of the test stand CR-TEST-2P and the elements of its equipment meet the requirements of international standards in terms of static and dynamic parameters-ISO 4008/1 and ISO 4008/2.

**CR-Test-2P** – is a CR pump test stand with a 2-channel electronic measurement unit.

- Frequency converter / Drive control software / Mounting kit
- Vacuum system / Mounting kit
- Mounting elements for inverter and vacuum pump
- Vacuum adjustment unit / Mounting kit
- Vacuum control unit
- Bench retrofit up to 2400 bar / hydraulic kit

The Cascade software has a user-friendly interface. The program contains built-in test plans for testing and coding Bosch, Delphi, Denso, Siemens (VDO) injectors. The functions of creating new test plans, editing built-in ones, as well as creating targets for Delphi C2i, C3i, C4i injectors are available. The results and progress of testing are displayed in graphical form and saved to a file and sent to print.

Cascade software allows coding BOSCH isa / ima cod, Delphi C2i / C3i / C4i\*, Denso, VDO Siemens injectors.

### **CR-TESTER** . CRT-5040

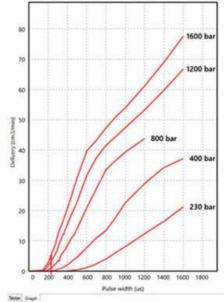

4-channel device for testing and testing Common Rail injectors Bosch, Denso, Delphi, Siemens VDO with a set of cables.

The device has the ability to connect to the FLAGMAN-FLOW beakerless measuring system with the ability to generate correction codes for Delphi C2i / C3i, BOSCH, DENSO injectors

At the CR-TESTER device. CRT-5040 has the functions of controlling the curtain of the metering unit, stopping the high-pressure pump, measuring and controlling the temperature in the tank, measuring the temperature of the back-tested injectors, measuring the injection start time, etc.

Computer control of the set through the CASCADE software.

**CR-Active** 

The **CR-Active** signal activator is designed to supply a control signal to the solenoid valve of Common-Rail injectors with a set of cables. It is used to measure the valve stroke when measuring the magnetic gap of electromagnetic Common-Rail injectors.

It has two delivery options: basic and complete. In addition to the signal activator and a set of cables, the complete set includes a stand for injectors, a set of measuring probes and adapters, and a measuring indicator head

# **CR-NeXT**

Armature activator device for Common-Rail injector solenoid valve. The **CR-NeXT** device is designed to supply a control signal to the solenoid valve of Common-Rail injectors. It is mainly used to measure the valve stroke when measuring the magnetic gap of common-rail solenoid injectors.

# **MONICA CTV-08**

The device **"MONICA"** CTV-08 for measuring the actuation current of the electromagnet of Common Rail type injectors

In its case, the device has 2 connectors for connecting a signal cable and a power cable. The measurement takes place by pressing the "Enter" button, after the flashing dot appears on the display, the device is ready for a new measurement. It is also possible to reset the measurement by pressing the "Reset" button

# PTC-2520 CP TESTER

Device for testing and testing high-pressure fuel pumps of the Common Rail system with a set of cables.

# **FMDE-520**

Device for testing the performance of fuel pumps of the Common Rail system of various manufacturers: Bosch, Delphi, Denso, Siemens, Cummins on a test bench.

It is a 2-channel liquid flow meter (pump supply and return discharge) in various modes, with digital information output to a backlit liquid crystal display.

# CRISTINA

The **CRistina** complex is designed for assembling injectors of the COMMON RAIL BOSCH, DELPHI, DENSO systems using a technology that allows you to calculate and select all the necessary adjusting elements.

CRistina repair- and testing complex is dedicated to assembing and disassembling Bosch, Denso and Delphi Common Rail inejctors according to manufacturer specified steps and mechanical tolerances. The complex offers the ability to measure relevant mechanical tolerances of the injector parts and electrical characteristics of the electromagnet. The assembly/disasembly steps and critical measurement points are presented by convenient step-by-step instructions descriptions and relevant images of the work process itself.

# DL-UNI20065 PR-TESTER.V05

Electronic pressure gauge suitable for manual presses:

DL-RP420 (without pressure sensor)

DL-RP425 (with pressure sensor 1500 bar)

Hand press RP 400 for injector testing with electronic pressure gauge DL-UNI20065

### Contents of delivery:

- mechanical press 1 pc. connecting tube 2 pcs.
- electronic pressure gauge with cable 1 pc.
- battery charger 1 pc.
- pressure sensor (for RP 425) for 1500 bar 1 pc.

### 3. DL-CR10021

Basic kit for testing CR injectors without controller CR-TESTER CRT-5040 and injection pump CP3 **DL-CR00088** 

The DL-CR10030 set is completed with a DL-CR00088 injection pump with a working pressure of 1800 bar.

## DL-CR00139

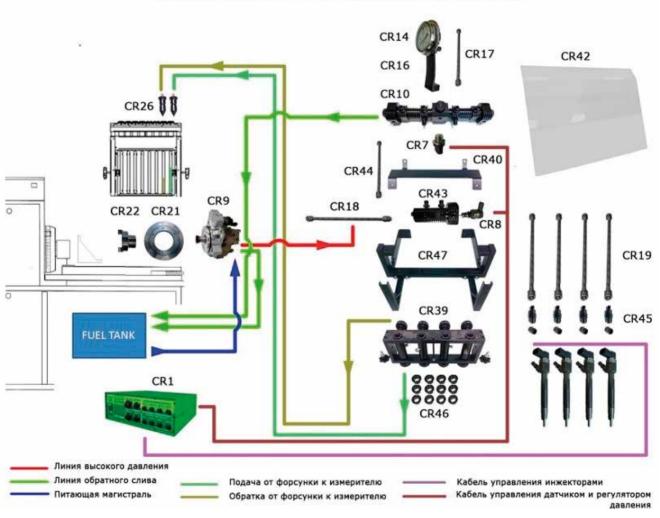

The injection pump kit **DL-CR00139** is used with a working pressure of 2400 bar and is supplied by separate order. Also, when installing **DL-CR00139** in the basic equipment kit, it is necessary to replace the sensor and pressure regulator for 2400 Bar and 2200 Bar, respectively.

# **BASIC KITS FOR CR NOZZLE TESTING**

**DL-CR10030** Basic equipment kit for testing CR injectors with controller CR-tester CRT-5040 and injection pump. The basic equipment kit is designed to test CommonRail injectors from various manufacturers (Bosch, Denso, Delphi, VDO (Siemens) Cummins, Caterpillar, AZPI.

The injection pump kit **DL-CR00139** is used for operating pressures of 2400 bar or 2200 bar and is available upon separate order. When installing DL-CR00139 in the basic equipment kit, it is necessary to replace the sensor and pressure regulator with 2400 bar or 2200 bar, respectively.

# STANDS and EQUIPMENT for testing common rail injectors and pumps

# EQUIPMENT FOR CHECKING PUMPS AND INJECTORS

#### DL-CR10029

Bracket for pressure accumulator (Rail)

#### Suitable for the following pressure accumulators:

DL-CR30181KIT DL-CR30522KIT DL-CR31053KIT for 2 pressure regulators for 3 pressure regulators

rail with cooling for 3 pressure regulators)

Some drives can be installed from various vehicles

#### It is established on any stands.

For installation, it is necessary to fix the bracket with one or two bolts on top of the stand plate. One or two bolts are preliminarily installed in the T-slot of the plate.

The number of bolts is determined independently or depending on the location of the bracket. For example, with a longitudinal installation on the stand plate, it is possible to fix the bracket with 1-2 bolts, and with a transverse arrangement, fastening is possible with only one bolt. The bracket is put on the bolts through the holes and the bracket is fixed to the plate with nuts.

#### ATTENTION!

Bolts and nuts are not included in the scope of delivery!

# DL-CR10027

Bracket for pressure accumulator (Rail)

#### Suitable for the following pressure accumulators:

DL-CR30181KIT DL-CR30522KIT DL-CR31053KIT for 2 pressure regulators for 3 pressure regulators

rail with cooling for 3 pressure regulators)

Some drives can be installed from various vehicles

It is installed regularly on stands CR-TEST 4E, CR-TEST-2P, on stands of the SPF series manufactured by Dieselland.

For installation on other stands, it is necessary to make two M10 threaded holes on the side of the plate in a convenient place.

The adapter is mounted in one of the 2 holes M14x1.5 in Rail. Used with pressure accumulators (rail) DL-CR31053, DL-CR30181 and DL-CR30522

#### The adapter has threaded holes:

- for a filter for a special fitting M18x1.5 (1 hole)
- for liquid supply M14x1.5 (2 holes from above)
- for connecting a pressure sensor M18x1.5 (1 hole)
- for connecting a safety valve
- M20x1.5 (1 hole)
- to relieve pressure in case of its excess M5 (1 hole)

#### Pressure accumulator (rail) for checking injectors and pumps with cooling (for 3 pressure regulators)

Pressure accumulator (Rail) for testing pumps CP1, CP2, CP3, CP4, Delphi, Denso and CR injectors The rail has cooling channels for improved thermal stabilization during testing and testing nozzles and pumps of the Common-Rail system.

#### Contents of delivery:

1.	DL-CR31049	Pressure accumulator for 3 pressure regulators
2.	DL-CR30497	Plug (M24x1.5mm) instead of regulator
		pressure - 2 pcs.
3.	DL-UNI30162	Plug (M18x1.5mm) instead of pressure sensor
		- 1 pc
4.	DL-UNI30056	Cooling fitting (1/2"x8mm) - 2 pcs.
5.	DL-UNI30020	Fitting (1/4 "x8mm) outlet of the return drain
		from the pressure regulator - 3 pcs.
6.	DL-UNI31478	Fitting (M18x1.5mm X M14x1.5mm)
		for high pressure tube - 3 pcs.
7.	DL-UNI50271	Plug for fitting DL-UNI31478 - 1 pc.
8.	DL-UNI30203	Plugs (1/8") for cooling channels - 4 pcs.
9.	DL-UNI30635	Plug (M12x1.5) for rubber-metal
		washer - 1 pc.

ATTENTION! Regulators and pressure sensor not included!

### DL-CR31514 Drain rail

Designed to work with the main pressure accumulator (rail) with installed 3 taxiways. This drain rail facilitates switching drain hoses. Normally, the pressure accumulator **DL-CR31049** is drained from

each pressure regulator (RD). When using this rail drain is made from one fitting.

#### DL-CR31528 Drain rail

Designed to work with the main pressure accumulator (rail) with installed 2 taxiways. This drain rail facilitates switching drain hoses. Normally, the pressure accumulator **DL-CR31049** is drained from each pressure regulator (RD). When using this rail drain is made from one fitting.

Pressure accumulator (rail) for checking injectors and pumps with cooling (for 2 pressure regulators)

#### The rail has threaded holes for:

- pressure sensor connection (M18x1.5)
- pressure regulator connection (2 holes M24x1.5mm)
- backflow connections and plugs (4 holes 1/8")
- a fitting for connecting a hose or tube for rail cooling and plugs (5 holes 1/4")
- supply and output of high pressure fluid from the rail (2 holes M24x1.5mm)
- high-pressure fluid inlet and outlet from the rail on the side (2 holes M14x1.5mm)
- rail mounting (4 blind holes M8)

# CRISTINA

**CRistina** High-quality testing and assembly complex of BOSCH, DENSO and DELPHI Common Rail injectors.

CRistina repair- and testing complex is dedicated to assembing and disassembling Bosch, Denso and Delphi Common Rail inejctors according to manufacturer specified steps and mechanical tolerances.

The complex offers the ability to measure relevant mechanical tolerances of the injector parts and electrical characteristics of the electromagnet. The assembly/disasembly steps and critical measurement points are presented by convenient step-by-step instructions descriptions and relevant images of the work process itself.

### DL-UNI20150 CRISTINA - PIEZO

The device is designed to test piezo injectors and piezo package.

The device confidently determines all the faults of the piezo package. Identifies problems that similar instruments or stands do not detect. The device was developed for the assembly of Siemens injectors, but it is also efficient with BOSCH injectors.

#### **Device capabilities:**

- 1. Signal giving to activate the nozzle on the hand press
- 2. Measurement of the resistance of the piezo package
- 3. Breakdown test on the case
- 4. Measuring the capacity of the piezo package
- 5. Measurement of the smooth running of the piezo package

#### Contents of delivery:

- 1. Signal generator "CRistina-PIEZO"
- 2. A set of cables to the signal generator "CRistina-PIEZO"
- Power cable 220V
- Main cable for connecting to the piezo package
- Cable adapter universal
- Adapter cable with crocodile clips
- Earthing cable
- 3. Passport (technical description, operating instructions) 1 pc.

## DL-UNI20150A CRISTINA - PIEZO ACOUSTIC

The device is designed to test piezo injectors and piezo package.

The device confidently determines all the faults of the piezo package. Identifies problems that similar instruments or stands do not detect.

The device was developed for the assembly of Siemens injectors, but it is also efficient with BOSCH injectors.

#### **Device capabilities:**

- 1. Signal giving to activate the nozzle on the hand press
- 2. Measurement of the resistance of the piezo package
- 3. Breakdown test on the case
- 4. Measuring the capacity of the piezo package
- 5. Measurement of the smooth running of the piezo package
- 6. Valve opening/closing control with acoustic test
- 7. Precise detection of valve opening and closing with an acoustic test

#### Contents of delivery:

- 1. Signal generator "CRistina-PIEZO"
- 2. A set of cables to the signal generator "CRistina-PIEZO"
  - Power cable 220V
  - Main cable for connecting to the piezo package
  - Cable adapter universal
  - Adapter cable with crocodile clips
- Earthing cable
- 3. Microphone
- 4. Microphone holder
- 5. Passport (technical description, operating instructions) 1 pc.

DL-RP425	(with pressure sensor. 1500 bar)

## Manual press for injector testing with 2-channel electronic pressure gauge

#### Contents of delivery:

- mechanical press 1 pc.
- connecting tube 2 pcs.
- electronic pressure gauge with cable 1 pc.
- battery charger 1 pc.
- pressure sensor (for RP 425) for 1500 bar 1 pc.

#### **DL-RP430**

### Manufacturer - ZECA (Italy) Flame test chamber (aspirator) nozzle spray

Allows for visual inspection performance of diesel i njectors without harm to health. The device is going to work liquid for reuse.

### **DL-RP500**

#### Manufacturer - ZECA (Italy) Manual press for injector testing with mechanical pressure gauge

#### Contents of delivery:

- mechanical press 1 pc.
- mechanical pressure gauge 1 pc.
- connecting tube 2 pcs.

DL-RP510	(without pressure sensor)
DL-RP515	(with pressure sensor. 1500 bar)

#### ZECA hand press for injector testing with electronic pressure gauge

#### Contents of delivery:

- mechanical press 1 pc.
- connecting tube 2 pcs.
- electronic pressure gauge with cable 1 pc.
- battery charger 1 pc.
- pressure sensor (for RP 515) for 1500 bar 1 pc.

**DL-RP520** (without pressure sensor)

**DL-RP525** (with pressure sensor. 1500 bar)

### ZECA hand press for injector testing with 2-channel electronic pressure gauge

#### Contents of delivery:

- mechanical press 1 pc.
- connecting tube 2 pcs.
- electronic pressure gauge with cable 1 pc.
- battery charger 1 pc.
- pressure sensor (for RP 525) for 1500 bar 1 pc.

#### **DL-UNI20150**

#### **CRistina-PIEZO instrument**

The device is designed to test piezo injectors and piezo package

#### Instrument capabilities:

- Sending a signal to activate the nozzle on the hand press
- Piezo resistance measurement
- Case breakdown test
- Measuring the capacitance of a piezo pack
- Measuring the smooth running of a piez

## MP-250 SASH

Machine for fast and precise valve seat restoration injector multiplier BOSCH Common Rail.

Restoration is achieved by the translational-rotational action of the lap in a special abrasive medium on the seat of the damaged nozzle valve.

Available in 2 versions:

- MP-250 SASH-Z with collet chuck
- MP-250SASH-S with self-locking chuck.
- Vibration mechanism in a protective case.
- Screw adjustment on table height.
- Compactness.

#### Contents of delivery:

- MPS30515 Lapping at 120 ° 5 pcs.
- MPS30516 Lapping at 124 ° 5 pcs.
- grinding paste diamond ASM 7/5(k)
- grinding paste diamond ASM 5/3 (k)
- grinding paste diamond ASM 3/2 (k)
- DL-MPZ30336 valve holder electromagnetic injectors

Lapping plate N1 for valve recovery injectors CR BOSCH Piezo

#### DL-CR31205

Lapping plate N2 for valve recovery injectors CR BOSCH Piezo

#### DL-CR50171

Collet chuck valve holder for BOSCH piezo injectors for restoration geometry by lapping.

Suitable for BOSCH piezo series injectors 0445115

#### DL-CR50209

collet chuck valve holder piezo injectors BOSCH for restoration geometry by lapping.

Suitable for BOSCH piezo series injectors 0445115

The cartridge has a tapered tail and shank diameter 7 mm.

The cartridge can be used both on a desktop drilling machines, as well as grinding machines GR-7300, GR-7400, GR-7500 and also on lapping machines MP-250.

#### DL-CR50052

Filler hydraulic compensator for Bosch piezo injectors.

Consists of two parts: housings with guides and clamps.

### DL-GR7500 Grinding machine for the needles of nozzles

Grinding machine for dressing needles of nozzles with rotation speed indicators

The machine is controlled by PWM controllers.

The control of the speed of rotation of the spindle and the processed body is regulated by means of rotary knobs located on the control panel.

Adjusting the brightness of the lower illumination of the processed body of rotation is performed using the rotary knob located in the upper part of the control panel. The control panel has a general power switch for the machine and three power switches on each electric motor of the corresponding drive and lower lighting bulbs.

On the rear side of the machine body there is a connector for supplying a 220-volt power cable, two 220-volt sockets and a 12-volt connector for connecting a monitor.

On the front side of the machine body there is a 12 volt connector for connecting the electric motor power cable to drive rotation bodies.

The grinding machine **DL-GR7500** can be used in conjunction with the kits: **DL-UNI20025**, **DL-UNI20026**, **DL-UNI20027**, **DL-UNI20030**.

which includes: electronic industrial microscope, tripod holder, top illumination and monitor. This kit is not included in the scope of supply and is available by separate order.

### **DL-GR7400**

### Grinding machine for nozzle needles with rotation speed indicators in percent

The **DL-GR7400** machine is used for grinding needles of nozzles and other bodies of rotation. The machine is controlled by PWM controllers.

The control of the speed of rotation of the spindle and the processed body is regulated by means of rotary knobs located on the control panel.

Rotation speed (revolutions) is displayed as a percentage.

Adjusting the brightness of the lower illumination of the processed body of rotation is performed using the rotary knob located in the upper part of the control panel.

The control panel has a general power switch for the machine and three power switches for each electric motor of the corresponding drive and a backlight.

On the rear side of the machine body there is a connector for supplying a 220-volt power cable, two 220-volt sockets and a 12-volt connector for connecting a monitor.

On the front side of the machine body there is a 12 volt connector for connecting the electric motor power cable to drive rotation bodies.

The grinding machine DL-GR7400 can be used in conjunction with the kits: **DL-UNI20025**, **DL-UNI20026**, **DL-UNI20027**, **DL-UNI20030**.

which includes: electronic industrial microscope, tripod holder, top illumination and monitor. This kit is not included in the scope of supply and is available by separate order.

### **DL-GR7300**

### Grinding machine for the needles of nozzles with speed indicators

The **DL-GR7300** machine is used for sharpening needles of atomizers and other bodies of rotation. The machine is controlled by PWM controllers.

The control of the speed of rotation of the spindle and the processed body is regulated by means of rotary knobs located on the control panel.

Adjusting the brightness of the lower illumination of the processed body of rotation is performed using the rotary knob located in the upper part of the control panel.

The control panel has a general power switch for the machine and three power switches on each electric motor of the corresponding drive and lower lighting bulbs.

On the rear side of the machine body there is a connector for supplying a 220-volt power cable, two 220-volt sockets and a 12-volt connector for connecting a monitor.

On the front side of the machine body there is a 12 volt connector for connecting the electric motor power cable to drive rotation bodies.

The grinding machine DL-GR7300 can be used in conjunction with the kits: **DL-UNI20025**, **DL-UNI20026**, **DL-UNI20027**, **DL-UNI20030**.

which includes: electronic industrial microscope, tripod holder, top illumination and monitor. This kit is not included in the scope of supply and is available by separate order.

### DL-UNI20025

## Set with industrial microscope, elongated tripod, light and monitor.

The microscope has a clear image and high resolution.

#### **Technical data:**

- 1. The magnification of the microscope: 8x-130x
- 2. Working distance : 50-200mm
- 3. Connect to monitor via ports: HDMI/VGA
- 4. Microscope size (width x length): 40mm x 115mm

#### Contents of delivery:

- 1. DL-UNI20016 Industrial electronic microscope with power supply (HDMI / VGA / AV).
- 2. DL-UNI20019 Tripod holder extended for microscope
- 3. **DL-UNI20018** Lamp diode for a microscope.
- 4. DL-UNI20021 Monitor
- 5. DL-UNI20022 Dedicated monitor holder on a tripod

### DL-UNI20030

## Set with industrial microscope, elongated tripod, light and monitor.

The microscope has a clear image and high resolution.

#### **Technical data:**

- 1. The magnification of the microscope: 8x-130x
- 2. Working distance : 50-200mm
- 3. Connect to monitor via ports: HDMI/VGA
- 4. Microscope size (width x length): 40mm x115mm

#### Contents of delivery:

- 1. **DL-UNI20010** Industrial electronic microscope with power supply (HDMI / USB / AV).
- 2. DL-UNI20019 Tripod holder extended for microscope
- 3. **DL-UNI20018** Lamp diode for a microscope.
- 4. DL-UNI20021 Monitor
- 5. DL-UNI20022 Dedicated monitor holder on a tripod

### DL-UNI20026

## Set with industrial microscope, elongated tripod, light and monitor.

The microscope has a clear image and high resolution.

#### **Technical data:**

- 1. The magnification of the microscope: 5x-100x
- 2. Working distance : 50-170mm
- 3. Connect to monitor via ports: HDMI
- 4. Microscope size (width x length): 40mm x 115mm

#### Contents of delivery:

- 1. **DL-UNI20013** Industrial electronic microscope with power supply and backlight (HDMI / USB).
- 2. DL-UNI20019 Tripod holder extended for microscope
- 3. DL-UNI20021 Monitor
- 4. DL-UNI20022 Dedicated monitor holder on a tripod

### **DL-UNI20027**

## Set with industrial microscope, elongated tripod, light and monitor.

The microscope has a clear image and high resolution.

#### **Technical data:**

- 1. The magnification of the microscope: 10x-180x
- 2. Working distance : 100-150mm
- 3. Connect to monitor via ports: HDMI
- 4. Microscope size (width x length): 40mm x115mm

#### Contents of delivery:

- 1. **DL-UNI20014** Industrial electronic microscope with power supply (HDMI / USB / AV).
- 2. DL-UNI20019 Tripod holder extended for microscope
- 3. **DL-UNI20018** Lamp diode for a microscope
- 4. DL-UNI20021 Monitor
- 5. DL-UNI20022 Dedicated monitor holder on a tripod

#### Microscope kit HDMI USB 1080P FHD 48MP x 200

The microscope has a clear image and high resolution Lens: 200X C-MOUNT magnification

#### Technical data:

1. Photo / video shooting

2. Additional functions: adding guide lines, image fixation,

mirroring, image rotation, digital zoom

- 3. Housing: aluminum alloy
- 4. Matrix: Panasonic
- 5. Matrix resolution 48 MP
- 6. Frame rate: at 1920\*1080 / 60fps
- 7. Outputs: USB, HDMI, TF card, infrared sensor for remote control
- 8. Power supply: DC-12V/1A
- 9. Max TF card capacity: 64G
- 10.HDMI image resolution: 8168\*6128 4:3 (50MP) 8168\*4592 16:9 (37MP) (for TF card),

#### Angle measuring kit

#### Contents of delivery:

- 1. Protractor electronic
- 2. Protractor bracket
- 3. Protractor axis NG31249
- 4. A set of M4 screws 3 pcs.

#### **Specifications:**

- 1. Measuring range: 0-360 degrees
- 2. Graduation: 0.1 degree
- 3. Accuracy : +-0.2 degree
- 4. Accuracy : 0.1 degree
- 5. Battery: 3V CR20032
- 6. Battery life: 1 year

#### DL-NG31263

Gauge for setting the angle of 60 degrees

#### DL-NG31253

Valve holder (pin) injectors BOSCH piezo to polish it

### DL-GR1090

Measurement kit angles of increased accuracy

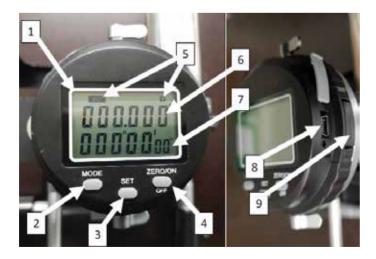

#### Contents of delivery:

- 1. Protractor electronic
- 2. Protractor bracket
- 3. Protractor axis NG50205
- 4. A set of M4 screws 2 pcs.

#### Specifications:

- 1. Measuring range: 0-360 degrees
- 2. Division value: 0.005 degrees (10 seconds)
- 3. Accuracy: +-0.2 degree
- 4. Accuracy: 0.08 degree (±30 seconds)
- 5. Working temperature range: 0 ÷40°C
- 6. Battery: 3V CR20032
- 7. Battery life: 1 year

On two lines at the same time the measurement value is displayed in decimal degrees (upper line) and in seconds (bottom line)

Prisms with electric motor assembly

Contents of delivery:

- 1. DL-NG50200 Prisms assemblies
- 2. DL-NG31189 platform
- 3. DL-NG50199 electric motor assembly
- 4. **DL-NG31246** Pencil holder for editing (no pencil)
  - DL-NG31309 Editing pencil
- 5. **DL-NG31290** Stop extension bracket
- 6. DL-NG31183 stop bracket standard

DL-NG50200 Prisms with holder assembly

DL-NG31189

Mounting platform prisms, electric motor and bracket with pencil for straightening stone.

DL-NG50199

Electric motor 12 volt 1000 rpm with protective cover with mounting bracket and pulley.

DL-NG31246

Editing pencil holder abrasive stone (no pencil). **DL-NG31309** Straightening Pencil abrasive wheel.

DL-NG31290

stop extension for installation of long details for their grinding.

DL-NG31183

stop bracket workpiece with standard length

### GM-08

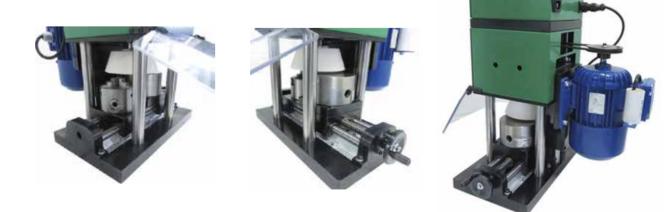

# Surface grinding machine with bottom movable desktop.

Designed for grinding shims, nozzle ends and other parts of fuel equipment.

#### Specifications:

Motor power	0.37 kW
Value of division	1 µm
Working stroke of the stone	35 mm
Height length Width	505 / 370 / 340 mm
Supply voltage	~220 V ±15%
Tolerance of parallelism of the surface of the workpiece	0,002-0,004 mm
The weight	60 kg

#### DL-UNI20208

Grinding stone for GM-08 conical, landing diameter 32mm, outer diameter 125mm at 80 grit

#### DL-GM50248

mandrel stone holder for modernized machines GM-08

#### DL-GM31280

Drive shaft with taper fit under the mandrel for the modernization of machines GM-08, issued before 04.2020.

#### DL-GM50263

Stone puller with mandrel with cone shaft.

### **MGM-500**

#### Surface grinding machine with moving column

Machine **MGM-500** is designed for grinding shims and other elements and bodies of revolution when they are fixed with a magnetic plate or clamps.

#### The design of the machine includes:

- The base housing in which the gearbox for the vertical movement of the column with grinding stone
- Electric motor with direct drive of the grinding cup
- Powerful magnet for grinding washers
- High-precision vise for trimming parts
- Protective cover
- Handle for vertical movement of the column
- Rotary handle
- Protective corrugation
- Indicator head with 0.001mm pitch
- Bracket with a cutter for straightening a stone is mounted on a protective cover

#### Specifications:

Vertical movement of the column	40 mm
Vise Width	50 mm
vise stroke	65 mm
stone grain	80 grit
Supply voltage	~220 V ±15%
Motor power	0.5 kW
Height length Width	310x260x450
Machine weight	43 kg
The number of revolutions per minute of the electric motor	2800 / 3600
Tolerance of parallelism of the surface of the workpiece	0,003-0,006 mm

### **PUMP TEST.02**

#### **Common-Rail High Pressure Pump Testing Equipment**

PUMP TEST .02

#### В состав комплекта входит: The kit includes:

1. The **PTC-2520** device is designed to provide user-programmable control signals to Common Rail injection pump pressure regulators to test their performance.

2. Device **FMDE-520**, designed to measure the performance of the Common-Rail injection pump in two channels.

- 3. Tool rack on wheels for easy operation.
- 4. A set of adapter cables.
- 5. Liquid fine filters (2 pcs.)
- 6. Software.

### **PTC-2520 CP TESTER**

Device for testing and testing high-pressure fuel pumps of the Common Rail system with a set of cables.

#### FMDE-520

Device for testing the performance of fuel pumps of the Common Rail system of various manufacturers: Bosch, Delphi, Denso, Siemens, Cummins on a test bench.

It is a 2-channel liquid flow meter (pump supply and return discharge) in various modes, with digital information output to a backlit liquid crystal display.

## AUXILIARY EQUIPMENT and TOOLS for checking and repairing DTA

#### Universal cradle for CR pumps

#### Delivery set DL-USN0021 (ST-03):

- 1. Rotary stand 1 pc.
- 2. Set of flanges for fastening CR pumps of 6 pcs.
- 3. Set of 4 pump support plates.

#### Delivery set DL-USN0021CR (ST-03CR):

- 1. Rotary stand 1 pc.
- 2. Set of flanges for fastening CR pumps of 6 pcs.

#### ATTENTION!

Holder plates for high pressure fuel pumps CR and rotary high pressure fuel pumps are also sold separately!

## FLANGES

## DL-UNI30474

Mounting flange for injection pump CP3 MAN, equivalent to Bosch 1685720258

#### DL-UNI30464

Mounting flange for injection pump CR (MB)

Mounting flange for injection pump CR (BMW, RENAULT, MB, Peugeot)

#### DL-UNI30884 Mounting flange

for injection pump MAN CP3.4 analog Bosch 1685720312

#### DL-CR31607

Mounting flange for injection pump DENSO HP0 094000-0635

#### DL-CR30860

Mounting flange for injection pump CR DENSO HP2 , HP3.

#### DL-CR30861

Mounting flange 50 mm for injection pump CR CP4. (AAE001-CP4)

#### DL-CR30862

Mounting flange 50 mm for injection pump CR CP4HS2 Bosch0445010637, Bosch0445010506.

## DL-CR30466

Mounting flange 68 mm, for injection pump CR Renault Megane, Delphi Siemens VDO, Land Rover, RangeRoverV8 and for HPFP VE

#### DL-UNI30428

Mounting flange 107 mm for injection pump CP3 Bosch.

**DL-UNI50008** 

Bracket for pumps, Bosch standard 125 mm. Installed on a stand.

#### DL-UNI30886

Mounting flange for injection pump 107 mm CP2 Bosch 0445020036 (Renault).

#### DL-CR31145

Mounting flange 80mm for injection pump CR CP3S3 Bosch 0445020060

DL-CR50159 Mounting stand HPFP SIEMENS

#### DL-CR31150

Flange for mounting on stand injection pump CR DELPHI with bore diameter 50 mm and mounting holes perpendicular to the plane of the bore.

#### DL-UNI30887

Mounting flange HPFP CRCP3 Mercedes, (Similar to SIRINI AAE001-03)

#### DL-CR31165

High pressure fuel pump mounting flange BOSCH CR / CP1H3 60mm For example BOSCH injection pump 0445010223 (Renault Megane 2012)

#### DL-UNI31207

Universal flange with mounting hole diameter 50 mm, without mounting holes. Created for independent fastening holes for pumps which boarding diameter 50 mm.

#### DL-UNI31208

Universal flange with mounting hole diameter 60 mm, without mounting holes. Created for independent fastening holes for pumps which boarding diameter 60 mm

#### DL-CR30866

Flange for stand mounting High pressure fuel pump CR DELPHI with landing 50 mm in diameter and three mounting holes: two of which are located perpendicular to the plane mounting hole, and one parallel to it.

#### DL-CR31228 (CP383)

Mounting flange for injection pump CR BOSCH 0445010091 MB Sprinter, Viti, Viano2,1 I. Since 2006 Mounting hole 50mm.

#### DL-CR31513

Flange for stand mounting High pressure fuel pump CR CP3S3/K140/40-789S Bosch 0445020125 Mounting hole 107 mm

#### DL-CR50267

Corner stand for fastenings for injection pump CR SIEMENS when tested on the stand.

#### DL-CR50266

Corner stand for CR DENSO injection pump mountings 097300-0023 during testing on the stand.

## COUPLINGS

#### **DL-UNI50132**

Compensation clutch with clamping jaws and reinforced package plate

#### DL-M24L (CR31098)

Long sleeve Ø 24 mm for injection pump DENSO HP0

Coupling slotted for injection pump CR (for MV slot 8x18)

#### **DL-MS9**

Coupling slotted for CR injection pump (for Renault slot 9x20)

#### DL-MS10D

Coupling slotted for injection pump CR Denso, slot 10x23

#### DL-MS10 S

Муфта шлицевая для **ТНВД Siemens Peugeot** Boxer 2.2,шлиц 10x21,6

#### DL-MS11

Coupling slotted for injection pump CR MAN (11 splines)

#### **DL-M17**

Cone coupling Ø 17 mm for injection pump CR and injection pump VE

#### **DL-M19**

Cone coupling Ø 19 mm for CR and VE injection pumps

with flange connection and reinforced package plates (analogue Bosch 1686401024)

DL-CB2 30016

Conical coupling with flange connection Ø 30 mm Cam Box2, injection pump

#### DL-CB1 30139

Conical coupling Ø 30 mm

#### **DL-M22** (UNI31481)

Cone coupling Ø 22 mm for injection pump CR

#### **DL-M23** (UNI30917)

Cone coupling Ø 23 mm for injection pump Continental A2C59517053, Bosch CR\ CP4HS2 0445010637, CP4S2 0445010611, CP4S1 0445010506

256

#### **DL-M24** (UNI30127)

Cone coupling Ø 24 mm for injection pump CRSR-3 mod.044502088

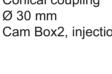

Cam Box2, injection pump

#### DL-MS4 (CR30955)

**Coupling for injection pump Bosch 0445010512** Grooves for splines are made on the coupling pump connector and cone for centering.

#### DL-CR31416

#### Coupling for injection pump Bosch 0445010512 CR / CP4S1

Grooves for splines are made on the coupling pump connector and cone for centering. Fastening is carried out to expansion joint flange. Fits to stands BOSCH EPS-815, CR-Test 4E, CR-Test 2P and mounts adapted to them.

#### DL-UNI31025

#### **Coupling for injection pump Bosch CP1** (included insert UNI31028 with groove

8 mm wide) and for high pressure fuel pump VDO (included insert UNI31027 with 9mm slot). Can be used on Bosch stands instead couplings 1685702090. Suitable for BOSCH stands EPS-815, CR-Test 4E, CR-Test 2P and customized attachments to them.

#### DL-UNI31029

**Coupling DL-UNI31029 for injection pump Denso** (included insert UNI31030 with groove 10 mm wide). Suitable for BOSCH stands EPS-815, CR-Test 4E, CR-Test 2P and fittings adapted to them.

#### DL-CR31271

**Coupling cone 17mm for testing CR pumps and VE injection pumps** Fastening is carried out to the flange compensation clutch. Suitable for stands BOSCH EPS-815, CR-Test 4E, CR-Test 2P and fittings adapted to them.

equinment for diesel

#### DL-CR31269

#### **Coupling cone 19mm for testing CR pumps and VE injection pumps** Fastening is carried out to the flange compensation clutch. Suitable for stands BOSCH EPS-815, CR-Test 4E, CR-Test 2P and fittings adapted to them.

#### DL-CR31558 (K23)

Cone coupling 23 mm for high pressure fuel pump CR Bosch and Continental Fastening is carried out to the flange compensation clutch. Suitable for CR-Test stands, BOSCH EPS-815 and mounts adapted to them Installed injection pump CR:

- Continental A2C59517053
- BOSCH CR/CP4HS2 0445010637
   DOSCH CR/CP4HS2 0445010637
- BOSCH CR/CP4S2 0445010611
- BOSCH CR/CP4S1 0445010506

#### DL-CR31251

## Cone coupling 24mm for high pressure fuel pump CR CP-3

Fastening is carried out to the flange compensation clutch. Suitable for stands BOSCH EPS-815, CR-Test 4E, CR-Test 2P and fittings adapted to them.

#### DL-CR31248

## Coupling spline (11 splines) for injection pump CR MANN

Fastening is carried out to the flange compensation clutch. Suitable for stands BOSCH EPS-815, CR-Test 4E, CR-Test 2P and adapted to them fasteners.

#### DL-CR31480

## Cone coupling 22 mm for checking pumps CR Siemens (VDO).

Fastening is carried out to the flange compensation clutch. Suitable for stands BOSCH EPS-815, CR-Test 4E, CR-Test 2P and adapted to them fasteners.

#### DL-CR31594

#### Coupling K35 for connection on the stand Fuel pump CP2 MAZ

Fastening is carried out to the flange compensation clutch. Suitable for stands BOSCH EPS-815, CR-Test 4E, CR-Test 2P and adapted to them fasteners.

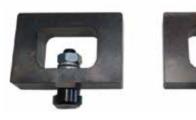

Set of equipment for the repair of injection pump CR CP4 Bosch.

Fitting kit with lock for pump check CP1

Contents of delivery:

- **DL-CR10004** Fitting Ø8mm 2 pcs.
- DL-CR31676 Mounting plate 1 pc.

#### **DL-CR50198**

Adapter for measuring pressure in HPFP CR CP-3. It is installed instead of the dispenser.

Contents of delivery:

• Adapter Body - 1/8" Barb - Herringbone for hose with internal Ø10mm

**ATTENTION!** Quick connector not included in the scope of delivery and must be ordered separately.

#### DL-CR31497

Pressure adapter booster pump CR

ATTENTION! The adapter comes without tube fittings and pressure gauge!

#### DL-CR31497KIT

Pressure adapter kit booster pump CR

Contents of delivery:

- DL-SP09570 L-shaped "quick"
- adapter M5x4mm
- **DL-SP09580** Fitting "mother" 1/4"x4mm for manometer
- **DL-P1002** Flexible PVC tube dia.4mm (100cm)

#### DL-CR50246

Manometer mounting bracket. Made in the form of a hook and gauge holder brackets. Used with pressure gauges of the series D-12-TV63

#### DL-UNI50264

#### Fitting 3/8 "x8 mm

#### Designed for the following equipment:

- 1. Stands CR-Test, SPF, SPN, DORPAT
- 2. FMDE device (2-channel liquid flow meter)
- 3. "PUMP-TEST.02" Test equipment
- CR high pressure pumps

The fitting has a 3/8" thread and is designed for hose diameter 8 mm

#### DL-UNI50265

#### Fitting 3/8 "x10 mm

#### Designed for the following equipment:

- 1. Stands CR-Test, SPF, SPN, DORPAT
- 2. FMDE device (2-channel liquid flow meter)
- 3. "PUMP-TEST.02" Test equipment CR high pressure pumps
- The fitting has a 3/8" thread and is designed for hose diameter 10 mm

DL-UNI50126 5 µm liquid filter with 3/8" outlets

DL-UNI50047

5 μm liquid filter with fittings (herringbone) by 10 mm

The test stand is designed to test pump injectors, pump sections.

**DORPAT Multi-Cam11** – The stand can be used for fuel equipment of any diesel engines of light and medium traction, including high-speed engines of cars, buses, trucks and agricultural tractors with UIS (unit injector system) and UPS (unit pump system) fuel equipment installed on them.

Stands are produced with a capacity of 11 kW.

The measurement takes place in an electronic system.

## **CAMBAT-FLOW**

Injection meter for pump injectors of pump sections of the UIS/UPS system (for UIS-Tester MULTICAM).

### **UIS-TESTER MultiCAM**

The UIS-Tester device is designed to test and verify the performance of unit injectors (UIS -Unit Injector System) and individual high-pressure fuel pumps with high-pressure solenoid valves (UPS -Unit Pump System).

## **CAMBAT-FULL**

Equipment for testing and checking unit injectors and pump sections of the UIS / UPS system without a mechanical part.

# Equipment CAMBAT-FULL includes:

- 1. Rack with measuring unit CAMBAT-FLOW
- 2. Control device for pump-injectors of pumping sections UIS-Tester MULTICAM
- 3. A set of connecting wires for injectors, measuring unit, etc.

## **CAMBAT-FULL-SET**

Equipment for testing and checking the pump injector of pump sections of the UIS / UPS system with a mechanical part.

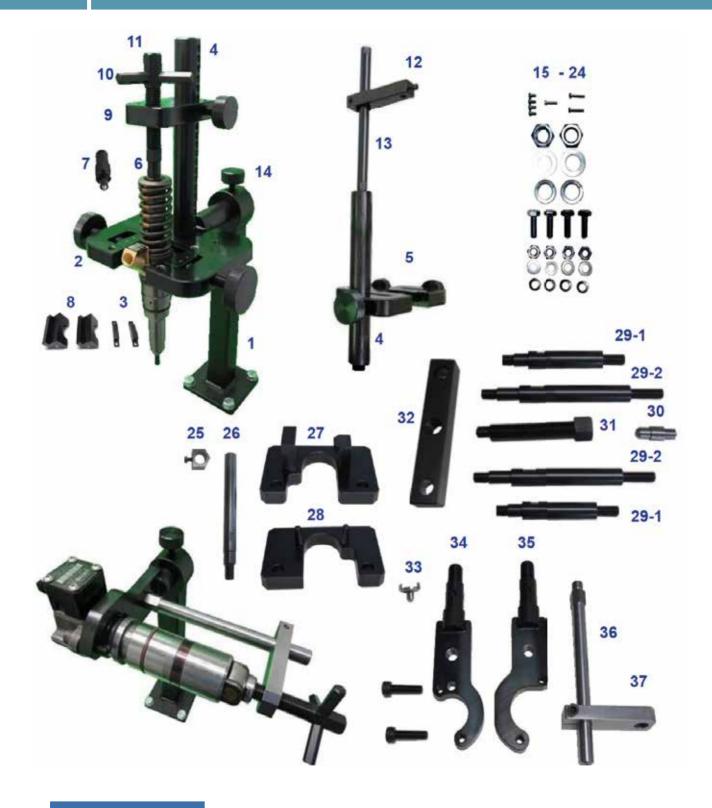

# Equipment CAMBAT-FULL-SET includes:

- 1. Rack with measuring unit CAMBAT-FLOW
- 2. Control device for unit injectors and pump sections UIS-Tester MULTICAM
- 3. A set of connecting wires for injectors, measuring unit, etc.
- 4. The mechanical part for testing the pump-injector pump sections CAM-BOX MECHANIC

The assay stand is designed for testing and adjusting with increased accuracy of in-line injection pumps, V-shaped injection pumps, distribution-type injection pumps with independent and forced lubrication systems, a pressurization corrector of all domestic manufacturers and major foreign ones: "BOSCH", "LUCAS", "ZEXEL", NIPPON DENSO.

#### When using additional equipment, the stand allows you to test and check:

- Common-Rail injectors (BOSCH, DELPHI, DENSO, SIEMENS)
- Common-Rail pumps (CP1, CP2, CP3) (BOSCH, DELPHI, DENSO)
- regulators and pressure sensors CR-pump-injectors of European and American cars
- electronic pumps such as VE, VP, Zexel, PE.

Stands are produced with a power of 7.5 kW (SPF-308, SPF-712), 11 kW (SPF-1108, SPF-1112). Stands SPF-708 and SPF-1108 have an 8-section measuring block. Stands SPF-712 and SPF-1112 have a 12-section measuring block.

#### **TECHNICAL DETAILS**

Stands of the **PTB** series for checking high-pressure fuel pumps allow you to perform all procedures related to testing and adjusting high-pressure fuel pumps in accordance with international ISO standards:

- drive system with smooth speed control;
- power supply system with smooth pressure regulation;
- pneumatic system with smooth pressure adjustment;
- a block for measuring the dosage of the strait;
- fastening elements of tested pumps.

The design of the injection pump test bench and its equipment elements meet the requirements of international standards in terms of static and dynamic parameters - ISO4008/1 and ISO4008/2

# CRISTINA

The **CRistina** complex is designed for assembling injectors of the COMMON RAIL BOSCH, DELPHI, DENSO systems using a technology that allows you to calculate and select all the necessary adjusting elements.

The software and hardware of the complex allows not only to accurately measure the required dimensions, but also to diagnose the state of the injector electromagnet with the measurement of the resistance and inductance of the winding.

The working program of the complex contains a detailed database of mounting dimensions of the most common COMMON RAIL injectors and a complete visualization of the assembly process, which allows you to avoid assembly errors and significantly reduce repair time.

To eliminate errors in measuring dimensions, the design of the CRistina complex allows you to accurately and rigidly base the nozzle body to eliminate the effects of vibration and uncontrolled movement of the measured element relative to the measuring device.

# DL-UNI20150 CRISTINA - PIEZO

The device is designed to test piezo injectors and piezo package.

The device confidently determines all the faults of the piezo package. Identifies problems that similar instruments or stands do not detect. The device was developed for the assembly of Siemens injectors, but it is also efficient with BOSCH injectors.

#### **Device capabilities:**

- 1. Signal giving to activate the nozzle on the hand press
- 2. Measurement of the resistance of the piezo package
- 3. Breakdown test on the case
- 4. Measuring the capacity of the piezo package
- 5. Measurement of the smooth running of the piezo package

#### Contents of delivery:

- 1. Signal generator "CRistina-PIEZO"
- 2. A set of cables to the signal generator "CRistina-PIEZO"

# DL-UNI20150A CRISTINA - PIEZO ACOUSTIC

The device is designed to test piezo injectors and piezo package.

The device confidently determines all the faults of the piezo package. Identifies problems that similar instruments or stands do not detect.

The device was developed for the assembly of Siemens injectors, but it is also efficient with BOSCH injectors.

#### **Device capabilities:**

- 1. Signal giving to activate the nozzle on the hand press
- 2. Measurement of the resistance of the piezo package
- 3. Breakdown test on the case
- 4. Measuring the capacity of the piezo package
- 5. Measurement of the smooth running of the piezo package
- 6. Valve opening/closing control with acoustic test
- 7. Precise detection of valve opening and closing with an acoustic test

#### Contents of delivery:

- 1. Signal generator "CRistina-PIEZO"
- 2. A set of cables to the signal generator "CRistina-PIEZO"
  - Power cable 220V
  - Main cable for connecting to the piezo package
  - Cable adapter universal
  - Adapter cable with crocodile clips
- Earthing cable
- 3. Microphone
- 4. Microphone holder
- 5. Passport (technical description, operating instructions) 1 pc.

# **CR-ACTIVE**

The **CR-Active** signal activator is designed to supply a control signal to the solenoid valve of Common-Rail injectors. It is used to measure the valve stroke when measuring the magnetic gap of electromagnetic Common-Rail injectors.

#### The base package includes:

- Signal generator "CR-ACTIVE" 1 pc.
- Power cable (2.1) 220V 1 pc.
- Main cable (2.2) for connection to the electromagnet 1 pc.
- Adapter cable (2.3) for light injector 1 pc.
- Adapter cable (2.4) for cargo injector 1 pc.
- Passport (technical description, operating instructions) 1 pc.

# **CR-ACTIVE**

#### EQUIPMENT AND CHARACTERISTICS

#### The complete package includes:

- Signal generator "CR-ACTIVE" 1 pc.
- Power cable (2.1) 220V 1 pc.
- Main cable (2.2) for connection to the electromagnet -1 pc.
- Adapter cable (2.3) for light injector 1 pc.
- Adapter cable (2.4) for cargo injector 1 pc.
- Stand for injectors 1 pc.
- Set of measuring probes. 1 set
- Set of 4 adapters for measuring force parameters. 1 PC.
- Measuring indicator head 1 pc.
- Passport (technical description, operating instructions) 1 pc.

#### Main technical data and characteristics:

Supply voltage	~220 V ±15%
Power consumption	up to 150 W
Four levels of current control signal	
Control signal duration	1.5 sec
Number of operations per minute	no more than 12
Short circuit protection	
Activator dimensions (depth x width x height) mm	240x230x72
Device weight	net 4kg
Weight of the complete set	net 9kg

# **CR-NeXT**

CR-NeXT - Armature activator device for Common-Rail injector solenoid valve

The CR-NeXT device is designed to supply a control signal to the solenoid valve of Common-Rail injectors. It is mainly used to measure the valve stroke when measuring the magnetic gap of common-rail solenoid injectors.

- CR-NeXT device 1 pc.
- Power cable 220 V 1 pc.
- Universal cable for connection to the injector 1 pc.
- Extension cable 1 pc
- Cable with crocodile clips 1 pc.

# **PUMP TEST.02**

#### **Common-Rail High Pressure Pump Testing Equipment**

PUMP TEST .02

#### The kit includes:

1. The **PTC-2520** device is designed to provide user-programmable control signals to Common Rail injection pump pressure regulators to test their performance.

2. Device **FMDE-520**, designed to measure the performance of the Common Rail injection pump in two channels.

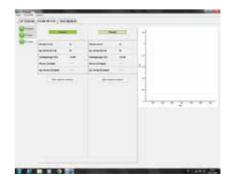

- 3. Tool rack on wheels for easy operation.
- 4. A set of adapter cables.
- 5. Liquid fine filters (2 pcs.)
- 6. Software.

# **PTC-2520 CP TESTER**

Device for testing and testing high-pressure fuel pumps of the Common Rail system with a set of cables.

# **FMDE-520**

Device for testing the performance of fuel pumps of the Common Rail system of various manufacturers: Bosch, Delphi, Denso, Siemens, Cummins on a test bench.

It is a 2-channel liquid flow meter (pump supply and return discharge) in various modes, with digital information output to a backlit liquid crystal display.

# **UIS-TESTER 2**

The **UIS TESTER Multi-CAM** device is designed to test and verify the performance of unit injectors (UIS - Unit Injector System) and individual high pressure fuel pumps with high pressure solenoid valves (UPS - Unit Pump System).

Using the **UIS TESTER Multi-CAM** device, you can measure the response time of an electric valve, the device also has the ability to automatically control the electric drive of the measuring unit, and additional options for self-updating the firmware and adapting to various CAMBOX versions.

#### The UIS TESTER Multi-CAM device allows you to:

- Set high pressure solenoid valve control signal;
- Measure the rotational speed of the pressure cam drive shaft;
- Set the required number of cycles;
- Preset mode, for 5 solenoid valve control modes;
- Set any value of the solenoid valve actuation advance angle.

- Instrument UIS TESTER Multi-CAM;
- Software with BOSCH test plans;
- Speed sensor; power cable;
- Adapter cable for connecting the speed sensor;
- Adapter cable for connecting BOSCH injectors 1 type;
- Cable-adapter for connecting injectors BOSCH 2type;
- Adapter cable for connecting DELPHI injectors;
- Universal adapter cable for injectors;
- Limit switch (reed switch) for protective fencing at the stand;
- Connector for curtain control cable.

# **DL-UNI20001 PR-INDICATOR**

Electronic pressure gauge for hand press (instead of regular). Thread for the sensor in the indicator leg M12x1.5.

#### Contents of delivery:

• Electronic pressure gauge with cable for 1500 bar pressure sensor – 1 pc.

• Charger for manometer accumulator – 1 pc.

NB! The pressure sensor is not included in the scope of delivery.

# **DL-UNI20002 PR-INDICATOR**

Electronic pressure gauge with pressure sensor for 1500 bar for a hand press (instead of the regular one).

#### Contents of delivery:

- Electronic pressure gauge with cable for 1500 bar pressure sensor 1 pc.
- Charger for manometer accumulator 1 piece,
- Pressure sensor for 1500 bar 1 pc.

# 9

#### DL-KM2000

#### Pressure gauge bracket for 2000bar. For rail DL-CR30181 and DL-CR30522

#### Contents of delivery:

- bracket
- clamping bar
- M6x60 bolt, nuts, washers 2 sets
- M6x45 bolt, washers 2 sets

#### DL-KM3000

Pressure gauge bracket 2000bar for installation on a stand plate.

#### Contents of delivery:

- bracket
- Profile bolt with nut, washer and grommet
- clamping bar
- M6X60mm bolt with nut, washer and grommet 2 sets

#### **DL-KM2500**

#### Pressure gauge bracket for 2500bar. For rail DL-CR30181 and DL-CR30522

#### Contents of delivery:

- main bracket
- pressure gauge mounting ring
- M6x45 bolt, washers 2 sets
- M6x30 bolt, washers 2 sets
- M6x10mm bolt 3 pcs.

Mesh 15 µm for filters DL-UNI5026, DL-UNI50047, DL-CR30051

#### DL-UNI30828

Переходник с фильтром Bosch высокого давления для проверки насосов CP1, CP2 ,CP3 ,CP4. Используется с накопителями давления (рейлом) DL-CR31083, DL-CR30181 и DL-CR30522. Устанавливается в любое удобное место рейла.

#### В переходнике имеются резьбовые отверстия :

- для фильтра под специальный штуцер M18x1,5 (1 отв.)
- для подачи жидкости M14x1,5 (2 отв.сверху)
- для подсоединения датчика давления M18x1,5 (1 отв.)
- для подсоединения предохранительного клапана M20x1,5 (1 отв)
- для сброса давления в случае его превышения М5 (1 отв)

#### Комплект поставки:

- 1. переходник 1 шт.
- 2. фильтр DL-UNF21100 высокого давления 1 шт.
- конусный штуцер для фильтра высокого давления M14xM18 – 1 шт.
- 4. штуцер M14x1,5 2 шт.
- 5. уплотнительная шайба 3 шт.
- 6. заглушка M14x1,5 1 шт.
- 7. фитинг Ø 6мм хМ5.

#### DL-CR50121

Переходник под фильтр высокого давления DL-UNF21100 Монтируется вместо обычного штуцера в накопитель давления (Rail) DL-CR30479, DL-CR30180, DL-CR30181, DL-CR30188, DL-CR30522, DL-CR30526.

Комплект поставки: переходник – 1 шт., корпус переходника с резьбой М14х1,5 – 1шт.

#### ВНИМАНИЕ!

Фильтр высокого давления DL-UNF21100 в комплект поставки не входит и заказывается отдельно!

#### DL-UNF21100

Used in test benches for testing of CR injectors, unit injectors PLD sections.

#### **CRS** Calibrol

## Calibration fluid for diesel fuel equipment

The CRS Calibrol calibration fluid (20 litre plastic canister container) is a test oil for testing injectors and pumps of diesel fuel equipment.

**CRS Calibrol** is a low viscosity working oil for calibration with a very tight viscosity tolerance. It is distinguished by an exceptional level of protection against wear and corrosion, as well as a low tendency to foaming.

#### **Calibration fluid SRS**

ISO 4113-CV-AW (VS 15665-OL-CV), Barrel 200 liters.

Used in test benches for testing of CR injectors, unit injectors PLD sections.
